

Part 1 Picture Description

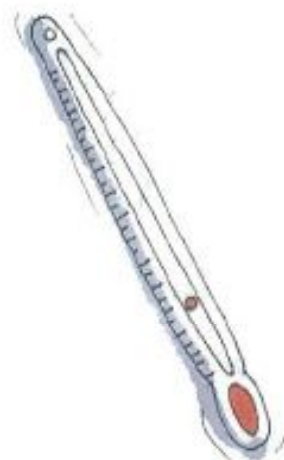

Lesson 2

What's the Difference?

Example

thermometer
vs
clinical thermometer

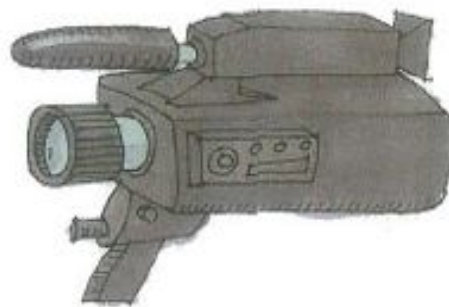

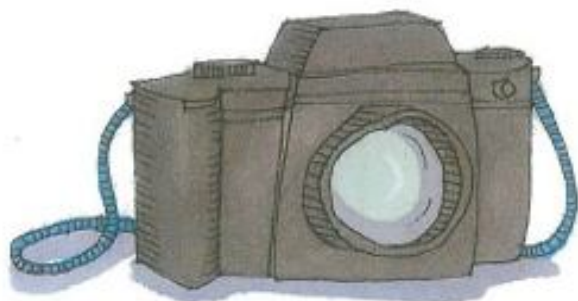

Answer

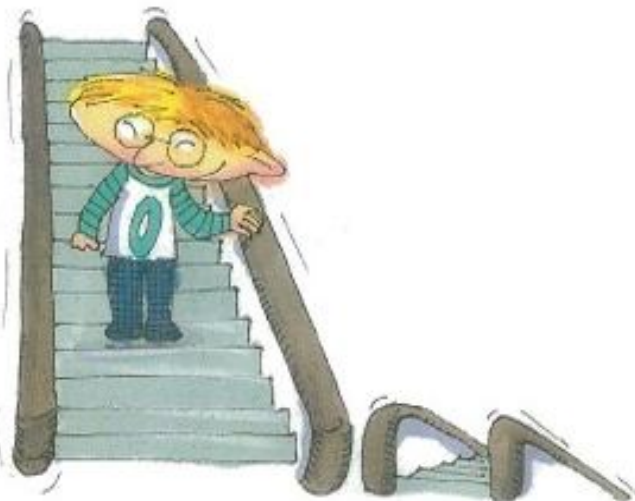

A thermometer is for measuring the temperature.
A clinical thermometer is a special kind, used to tell if a person has a fever. If you go to the hospital, a nurse checks your body temperature before the doctor examines you. If your temperature is too high or too low, you are probably sick.

What's the difference?

1. camera vs video camera

2. escalator vs elevator

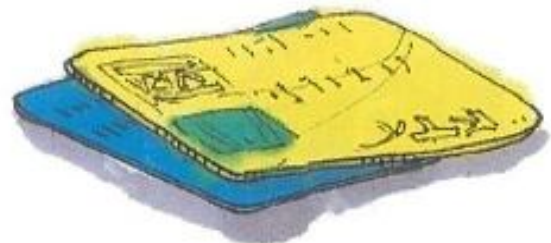

Part 1 Picture Description

Lesson 2

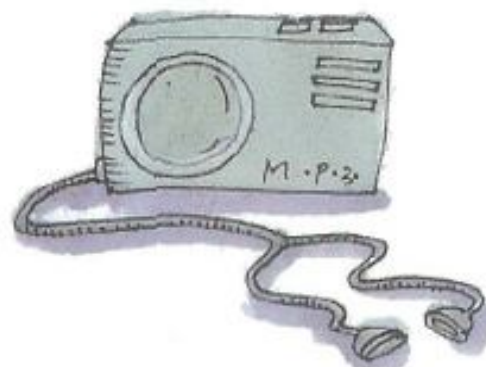

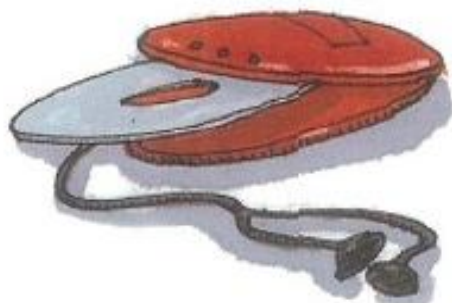

3. tap water vs bottled water

4. cash vs credit card

5. CD player vs MP3

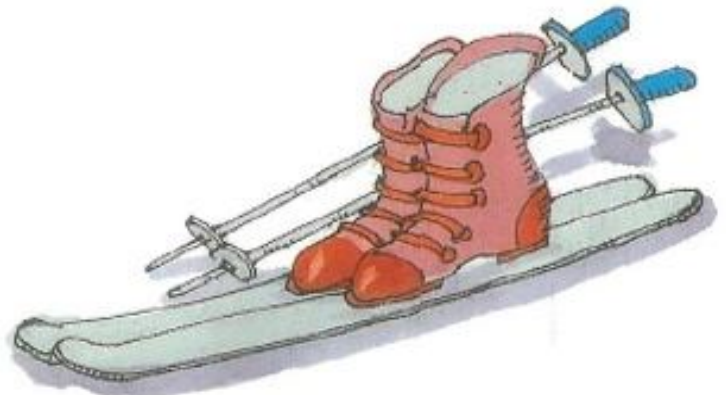

6. microscope vs telescope

Part 1 Picture Description

Lesson 2

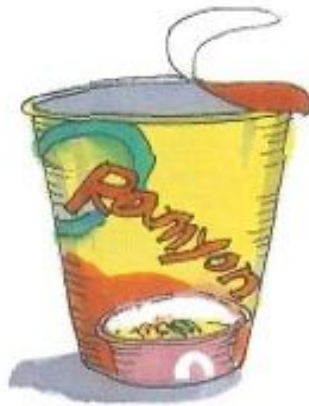

7. skates vs skis

8. fan vs air conditioner

9. ramyon vs cup ramyon

10. TV vs newspaper
