| _____ 9. crush | i) waste material carried off through pipes |
| _____ 10. liquid | j) a part of a mixture |

Reading

1. Beer is an alcoholic drink made from grain, hops, water, and yeast.
2. First, grain such as barley or millet is malted. This means it is allowed to grow into **seedlings** before it is dried and **crushed**. Other cereal grains like corn or wheat are then added, along with hot water, which turns the mixture into a mash. The **liquid** that runs off from the mash is put into a large **container** and boiled with dried hop flowers. Hops give beer its special flavor. Other flavors can be added. When the liquid cools, **yeast** is added and the brew is left to ferment. This is when the alcoholic content of beer forms.
3. The main **ingredient** of beer made in North America and Europe is barley. Millet or corn is often used in Africa, and the Japanese make beer from rice.
4. People have been making and drinking beer for almost 6,000 years. The Sumerians, who lived in what is now Iraq, left the earliest written records about brewing beer. Later civilizations, including the ancient Egyptians, grew special types of grain to make beer. Ancient people drank beer for its alcoholic content and because it helped to keep them healthier and kept them from going hungry.
5. In Britain, **monks** were brewing beer by 543 AD. In the 1400s, women brewed beer as one of their household **duties**. Some of them made such good beer that other people bought it from them. By the 1700s, large **breweries** were making and selling beer.
6. People drank beer because there was not much else to drink. Clean drinking water was hard to find, especially in big cities like London, until **sewage** systems were built. In the meantime, men, women, and children drank beer at every meal, including breakfast.
7. Today, beer is still brewed and enjoyed in every part of the world.

Comprehension

A. True or False?

Read the statements below.

If the statement is true, write T beside the sentence.

If it is false, write F and correct the information.

- _____ 1. People have been making beer for about 600 years.
- _____ 2. North America and Europe use the same main ingredient in their beer.
- _____ 3. The first written records about beer-making came from the ancient Egyptians.
- _____ 4. Women used to make beer as one of their household duties.
- _____ 5. In the past, it was common for children to drink beer.

B. The Process of Making Beer

Put the following beer-making steps in the correct order (1–8).

- _____ When the liquid cools, yeast is added.
- _____ Grain grows into seedlings.
- _____ The brew is left to ferment.
- _____ The liquid that runs off the mash is put into a large container.
- _____ The seedlings are dried and crushed.
- _____ The alcohol content of the beer forms.
- _____ The liquid is boiled with dried hop flowers.
- _____ Other cereal grains and water are added, which turns the mixture into a mash.

C. Ask and Answer

Practice asking and answering the following questions with your partner. Then write your answers in complete sentences in your notebook.

- 1. What gives beer its special flavor?
- 2. How does Japanese beer differ from North American beer?
- 3. Why did ancient people drink beer?
- 4. When did large breweries start making beer?
- 5. Why did many people drink beer with every meal in the 18th century?
